

May is

BUILDING SAFETY MONTH

“SAFER Buildings, SAFER Communities, SAFER World”

For more information please visit the

City of Savannah Development Services website

DISASTER PREPAREDNESS

-Check your home for loose siding, shingles, windows or fences. Our staff is happy to help with questions.

-If severe weather is predicted, Development Services helps ensure jobsites are safe. We advise contractors on securing cranes, building materials and erosion control.

WATER SAFETY

-Many City departments work together to get clean water to your home or business. Helping regulate water runoff, stormwater and wastewater treatment.

-Code officials inspect proper installation so you have plenty of hot showers, clean dishes, and smooth running drains

RESILIENCY, SUSTAINABILITY, INNOVATION

-Technology and innovation in the building industry make buildings safer and more resilient. Green buildings and sustainable construction strategies reinforce health, life and safety benefits, as well as providing for energy efficient buildings, that building codes offer.

PARTNERS IN SAFETY

- Building Safety professionals are community partners for protecting public health, safety, and welfare through effective code communication

- Code officials ensure buildings, including homes, businesses, and places of public assembly are built to meet consistent building and life safety codes
