LOW WATER COURSE OF SAVANNAH RIVER

**SOUTHERN FERTILIZER & CHEMICAL CO.**  
**MITCHAMER ISLAND PLANT**  
This plant is situated on the Savannah River, Georgia, and is owned and operated by the Southern Fertilizer & Chemical Co. It is a large industrial plant with a capacity of 1,000,000 pounds of fertilizer per year. The plant is situated on a small island in the river, and is accessible by a narrow causeway. The plant is surrounded by water on three sides, and is protected by a low wall. The plant is a very important part of the Southern Fertilizer & Chemical Co. and is one of the largest fertilizer plants in the South.
